MINING NEWS

TOWNSITE CASE ENDS AT GOLDFIELD, NEV.

In the first ruling of the kind ever made in Nevada, Judge Somers in the district court this morning sustained the validity of a mining title where a valid location has been proved to be established as against a federal patented townsite title to the same land in rendering a decision in favor of the plaintiff in the action of E. E. Blake against J. H. Parks and others to quiet title to two townsite lots with improvements included in the area of ground known as the Miss Race Fraction claim, which forms a part of the town of Goldfield.

Blake located the claim in 1904 and proved it mineral bearing, and kept up his annual assessment work. Subsequent to its location as a mining claim by Blake, former Judge Theron Stevens, as trustee, was issued a townsite patent, covering the same ground. The lots were sold and to quiet title the action was brought. Judge Somers holds that the Blake location was valid and superior to the townsite patent.

The action was tried, said Judge Somers, upon the issue made by the plaintiff and the answer of the defendant, Parks, claimed that the land in question was and is not mining ground, and that the plaintiff never made a valid mining location. It was further alleged that a discovery of valuable ore had been made on the ground, and that a townsite patent covered the claim.

The testimony, said Judge Somers, goes to show that a vein of ore was discovered, in fact, two veins, upon one of which a shaft was sunk to the depth of sixty feet, and all the way down assays were procured of values ranging from \$2.40 to \$16 per ton. The work, said the court, was continued annually from year to year from 1904 until the commencement of the action.—Goldfield Tribune.

PECULIAR WAYS OF DISCOVERING MINES.

Mining districts are occasionally discovered by the wildest of fortune, says the Mining and Engineering World.

Once on a time a prospector and his wife were plodding over the desert. Angered by the heat and by a particularly "ornery" mule, the man raised a stone to throw at the critter. Something in the rock, occurring in the midst of the barren wastes, attracted the prospector's attention. That is how Tonopah, Nev., was discovered.

Gold fields accidentally discovered by opening the crops of chickens and poultry are common. Their number is legion, and they date from prehistoric times. The latest discovery of this class is at Manitowish, Manitoba. Here hundreds of miles from the nearest mining region, gold placers were discovered in this manner only a few months ago.

A couple of centuries ago some of the Brazilian pioneers were in the habit of using little pieces of quartz and quartz-like pebbles as counters in games of checkers. One day a visitor who had seen crude diamonds in Amsterdam, Holland, recognized the true nature of some of the pebbles. Thus did the diamond mining industry originate in Brazil.

The diamond fields of South Africa were also discovered by accident. One Daniel Jacobs lived with his Boer family on the banks of the Orange river near Hopetown. Beautifully colored stones were picked by the children along the river banks. One very bright pebble found in 1867 attracted the attention of Mrs. Jacobs. A neighbor offered to purchase the pretty specimen, but the Dutch housewife laughed at accepting anything for a pebble, and gave the stone away. It proved to be a diamond weighing 21.2 carats and worth \$2,500. The diamond industry of South Africa dates from this beginning.

Recently mercury ores were discovered by a peculiar accident near Field, British Columbia. The manager of the Canadian Pacific railroad at Field found mercury in the toilet sink. At first it was supposed someone had broken a thermometer, but the event recurred, and finally an examination showed native mercury in the gravels of the stream supplying the hotel with water.

The great silver fields of northern Ontario owe their discovery to accident. The ores were encountered in the profound northern forests in a cut made by surveyors for a railroad.

BLUE BULL COMPANY PLANS TO REORGANIZE

The regular annual meeting of the Blue Bull Mining company was held on April 5. Business was confined to routine matters and the election of directors. The following were elected: George Wingfield, James M. Fenwick, Frank Favier, F. R. Prosser and A. H. Howe. The officers chosen for the ensuing year are: George Wingfield, president; J. M. Fenwick, vice president; A. H. Howe, secretary and treasurer, and Frank Favier, assistant secretary. The appointment of K. M. Simpson as general manager of the company's property was ratified. Legal steps incident to the reorganization of the Blue Bull company are now in progress, but will require some time before they can be brought to a final conclusion and the stockholders of the company will be notified in due time of the progress made toward the consummation of this plan. Friday's meeting took no action regarding the company reorganization or the projected development work on the company's property. This work will be outlined by the management and by those in control of the company's affairs and will be started shortly under the direction of Manager Simpson.

STRIKE IN MONTANA TONOPAH IS LARGE

The report from the Montana-Tonopah mill states that during the past week 1,053 tons of ore were treated for an average recovery of 53.1 per cent of the assay values. In the past month 4,748 1-2 tons of ore were treated and forty-seven bars of bullion, weighing 3,789 pounds, or 55,200 ounces, and 67 1-2 tons of concentrates were shipped as the result of these operations. This having been up to now, the banner month for production since the installation of the company's mill.

In the past week a total of 146 feet of new ground was broken in the underground workings. The development is in stage 162, of what is undoubtedly the greatest shoot of high grade ore ever opened up in Tonopah. While the development of this vein

to greater depths is being watched, a new vein was cut three weeks ago on the 615-foot level, and this was followed by three important developments during the past week, which add enormously to the value of the property, and greatly increase its ore reserves and place the Montana in the front rank of the Tonopah miners.—Tonopah Miner.

TO WORK VALUABLE CLAIMS.

Salmon City, Ida., April 15.—J. T. Burns of Colorado Springs is preparing to start work on his tungsten properties in the Pahsimaral district. He has just returned from the east, where he has been in conference with mining men who are interested in the Ina Mining & Milling company and other properties in the tungsten region.

The claims are located in the Blue Wing district, about a mile northeast of Patterson in the Pahsimaral valley. The concentrates run about \$400 to the ton and the percentage of tungstic-oxide compares favorably with any other deposit in the United States.

The chief commercial use of tungsten is in steel hardening, such as in armor plates and metal-cutting lathes. Its use in the latter enables lathes to do four times the amount of work done by those in which carbon steel is used.

OLD-TIME REMEDY DARKENS THE HAIR

Gives Color, Lustre to Faded and Gray Hair—Dandruff Quickly Removed

For generations Sage and Sulphur have been used for hair and scalp troubles. Almost everyone knows the value of such a combination for keeping the hair a good even color, for curing dandruff, itching scalp and falling hair, and for promoting the growth of the hair. Years ago the only way to get a Hair Tonic of this kind was to make it in the home, which was troublesome and not always satisfactory. Nowadays, almost any up-to-date druggist can supply his patrons with a ready-to-use product, skillfully prepared in perfectly equipped laboratories.

An ideal preparation of this sort is Wyeth's Sage and Sulphur Hair Remedy, in which Sage and Sulphur are combined with other valuable remedies for scalp troubles and thin, weak hair that is losing its color or coming out. After using this remedy for a few days, you will notice the color gradually coming back, your scalp will feel better, the dandruff will soon be gone, and in less than a month's time there will be a wonderful difference in your hair.

Don't neglect your hair if it is full of dandruff, losing its color or coming out. Get a fifty cent bottle of Wyeth's Sage and Sulphur from your druggist, and see what a few days' treatment will do for you. All druggists sell it, under guarantee that the money will be refunded if the remedy is not exactly as represented. Special Agent, A. R. McIntyre.

SHERIFF GOES TO COAST.

Salmon City, Ida., April 15.—Sheriff Mahaffey has gone to San Francisco to bring back Harvey W. Sprague, who confessed that he had blown up and robbed the safe of Monk & Co.'s general store in Salmon City on December 22, 1909, securing about \$2,000 in money and checks.

Sprague has further declared that his confederate was E. Stevens and that the pair went from Salmon City to St. Louis, where they separated, Stevens going to Detroit.

If Sprague sticks to his story, he will receive sentence at the term of court next week. It is said that the local officers have no objection to which they can hold him in Salmon City, except upon his own sworn confession.

AN AMBITION.

To do my little day by day.
To help my neighbor if I can,
To strive with all my strength to play
My part as well bests a man.

To tell no matter how I try,
My best has never been attained;
To keep an ideal always high
To see, but never to be gained.

To fail in deed, but not in thought,
To wish and strive with all my soul
For glories men have ever sought,
For sound life's depth, and not its shoal.

To live among the stars and dream,
Unwilling to be soiled clay,
And still keep hope when troubles seem
To make impossible my way.

—Detroit Free Press.

BABY FOR SALE.

Chicago, April 15.—Anna Sipepa, three months old, is for sale for \$5,000 by her parents, Mr. and Mrs. Louis Sipepa, according to an advertisement in a newspaper here. There were six in the family before the arrival of Anna and the father, who earns \$15 a week, says he is unable to care for the baby. The infant is the second Italian child offered for sale here within a few weeks.

SALT LAKE AND STATE NEWS

MRS. L. E. MAIBEN DIES IN COAST CITY

Provo, April 15.—A telegram was received in Provo this morning announcing the death of Mrs. Louise E. Maiben at Los Angeles on Saturday morning.

Mrs. Maiben left here for the coast about two weeks ago, thinking the change would benefit her health. While the telegram did not state the immediate cause of death, relatives here think it must have been heart failure, superinduced by asthma.

She was the widow of the late Henry J. Maiben, was the daughter of William and Hannah Adams Harrison, and was born at St. Joseph, Mo., April 9, 1861. She came to Utah with her parents in 1862 and for some time lived in Salt Lake. She is survived by nine children, Mrs. Walter D. Dixon, Mrs. Scott P. Stewart, Warren H. Dora, Olive, Jeta, Grover, Heber, Denton and Ashton Maiben, all residing here.

Warren H. Maiben, the oldest son, and two other children, were with their mother in Los Angeles at the time of her death, and will return with the body to Utah. The body is expected to arrive here some time today.

VETERAN MINER DIES.

Bingham, April 15.—John Brink, said to be the oldest man in the camp, died here this morning of pneumonia. He was 94 years old and had followed the mines in Utah and elsewhere for more than half a century. He was born in Sweden in 1818 and came to America while a young man. He arrived in Bingham in 1871.

Until several days ago, when he was taken with a severe cold, Mr. Brink was in full possession of his faculties. His feats of strength, despite his age, were a matter of much reputation throughout the camp. A son, George Brink of Bingham, survives him. Charles Brink, a former member of the legislature from this district, is his nephew. Funeral arrangements have not been made.

NORTH LOGAN PEOPLE EXERCISED

Logan, April 15.—The North Logan people are getting exercised over the report that the Eccles interurban railway is to miss their town, and they have held a conference with Robert Anderson, Mr. Eccles' manager here, in an endeavor to have the road run through that place. The route said to be deemed most feasible by the Eccles engineers is that running from Fourth East direct to Hyde Park, and that of course would leave North Logan out of it altogether.

ENGAGEMENT ANNOUNCED.

Chicago, April 15.—Mr. and Mrs. Thomas Jensen of 680 Alma avenue, Austin, announce the engagement of their daughter, Alice Myrtle, to Edward Samson Harvey of Salt Lake City.

THE DOCTOR'S QUESTION

Much Sickness Due to Bowel Disorders.

A doctor's first question when consulted by a patient is, "Are your bowels regular?" He knows that 68 per cent of illness is attended with inactive bowels and torpid liver, and that this condition must be removed gently and thoroughly before health can be restored.

Reckall Orderlies are a positive, pleasant, and safe remedy for constipation and bowel disorders in general. We are so certain of their great curative value that we promise to return the purchaser's money in every case when they fail to produce entire satisfaction.

Reckall Orderlies are eaten like candy, they act quietly, and aid in producing a soothing, strengthening, healing influence on the entire intestinal tract. They do not purge, grip, cause nausea, flatulence, excessive looseness, diarrhoea, or other annoying effects. They are especially good for children, weak persons, or old folks. Three sizes, 25c, 50c and 75c. Sold only at our store—The Reckall Store, T. H. Carr, Druggist.

Cheapest accident insurance—Dr. Thomas' Eclectic Oil. Stops the pain and heals the wound. All druggists sell it.

SPEAKS TO THE DEAF AND BLIND

The pupils in the State School for the Deaf and Blind were given an interesting and instructive address Saturday evening by Rev. J. E. Carver, on "The Overcoming of Difficulties." The speaker's words were interpreted in the sign language by the superintendent, and the pupils were able to get a very clear conception of the address in that way.

The speaker dwelt upon the case of John Marshall, who was blind, yet did not allow his misfortune to keep him from being a great preacher and author. He drew forceful illustrations from the lives of many persons and sent home the idea that desire and determination will overcome almost any obstacle. He brought up the story of the mulatto who, while carrying paint buckets for a painter, experimented in mixing paints, and practiced with a brush until he became so skillful that he left his master and took up art, becoming in a short time one of the greatest painters in his time. As an illustration of the onward march of civilization, Rev. Carver spoke of a recent visit to a museum where he said he found an ancient hour glass, and beside it was a modern Swiss watch that not only kept the time accurately, but struck the hour as well.

The Amalgamated Woodworkers, Union recently united with the Brotherhood of Carpenters, has paid millions in benefits. Accident benefits are paid by this society. They run from \$350 to \$700 for total disability. Any member reaching the age of 50 is entitled to an old age pension of \$2.80 per week. This must be paid him whether he is able to work or not.

Children don't care!

If they did care they would forget!

Wrigley's **SPEARMINT** makes it easier for them to care for their teeth than not to care.

If your children chew it every day, the friction and the mint leaf juice preserve their teeth indefinitely.

While they chew it they also help digestion. Most children don't chew food properly—don't create enough saliva. Chewing this dainty helps digest the "gumpings."

And all this applies to you—Mr. or Mrs. or Miss!

Buy it by the Box of any dealer. It costs less.

Pass it around after meals.

Look for the spear
